

Stanton Garage Men Here

James Proffitt, of the Stanton Garage was here Saturday with one of the splendid new Durant machines on exhibition to prospective buyers. He also had a touring model of the New Star machine which is a wonderful little car. These two machines in their various model are a splendid line to carry, and Mr. Proffitt fully understands their superior quality and merit and is taking advantage of these qualities when demonstrating to prospects. With the advertising contemplated by the Stanton Garage the coming season, a bright business is in store for them.

Variations of Sound

The exhaust from engines running oil pumps in the field 10 miles away can often be heard very plainly in portions of this town where no particle of sound can be heard from the larger engines operating at the light plant in the central part of town. Trains on the Winchester and Irvine road 10 miles away can be heard in this town when they will not be noticed two miles out on the L. & E. division. This is accounted for by the increased elevation.

Trying Out Limestone

Limestone as a means of building up soils and boosting crop yields is getting increased attention from Webster county farmers living in the Slaughters community. Seven of them this fall ordered 80 tons which will constitute the first limestone they have ever used on their farms.

Several Powell farmers have recently used limestone pulverized and find it to have much value as a soil builder.
